

GNS at the DECON

2021-11-15

At the first DECON International Online Conference, Dr Linus Bettermann, Director Sales and Marketing, gives an interview on "Reactor Core Unloading and Transport of Spent Fuel Elements to the Interim Storage Facility" and Jörg Viermann, Head of Department Sales Large-scale Projects, will give the presentation "The Squaring of the Circle - Packaging Germany's Nuclear Heritage".

This year, the international online conference on decommissioning and dismantling (16 to 19 November) focuses on current developments in Germany and South Korea. In over 30 interviews and presentations as well as seven panel discussions, experts will provide insight into their experiences. Visitors can also get information at exhibition stands in a virtual exhibition hall. Additional poster sessions and company presentations are offered for students and PhDs.

In addition to the lectures, GNS will be represented with a virtual booth where we will be available to you via live chat.
